Professional summary

Full Stack Developer with experience in creating and maintaining web projects, including landing pages and management systems. Proficient in React, JavaScript, and Node.js, with solid technical training in Systems Analysis and Development. During my experience at the Surubinense Cultural Association, I implemented SEO practices that resulted in a 70% increase in website visibility and a 90% reduction in loading time, improving accessibility to cultural information for the local community. Passionate about technology and results-driven, I seek an opportunity to apply my development skills and contribute to the growth and innovation of a team, standing out for my ability to solve complex problems and provide scalable solutions.

Education

Technical Degree in Systems Analysis and Development | ETE Antônio Arruda de Farias, 12/2023

- Web Development (HTML, CSS, JavaScript, PHP)
- Systems Security
- Computer Networks
- Teamwork

Additional Training

Agile Explorer, IBM – 12/2024

JavaScript Impressionador (JavaScript and Node.js), Hashtag Treinamentos – 05/2024

Professional Experience

Associação Cultural Surubinense | January 2024 – Present

Volunteer Full Stack Developer

- **Developed an institutional website** to promote the culture and history of Surubim-PE, increasing the visibility of local cultural projects.
- **Created a robust administrative panel** to manage the news section, enabling the intuitive addition, editing, and removal of content.
Technologies used:
Frontend: React, Next.js, Tailwind CSS; Backend: Express.js, MySQL.
- **Implemented SEO practices** that significantly improved website visibility by 70% and reduced loading time by 90%, facilitating community access to cultural information, receiving excellent feedback.

Additional Information

I have developed several projects during my studies, which are showcased in my portfolio. Highlights include:

- **Pet Shop System (Full Stack):** A complete application integrating features for managing pets and their owners, with a user-friendly interface and a robust database, resulting in a highly satisfying user experience.
- **Product Catalog (Frontend):** A project focused on creating an intuitive user interface for viewing and selecting products using modern technologies, enhancing navigation and customer experience.
- **Login and Registration System (Frontend):** Implementation of a secure and responsive solution for user authentication, ensuring a seamless access experience and improving data security.

For more details about these and other projects, please visit my [portfolio](#).
